EXPERIENCE

Website Development

Freenlance   March 2023, Toronto, Canada

360 Photo Booth
- Developed a static website with four pages.
- Pages include Home, Services, Contact us and FAQ.
- Used Bigrock as hosting provider and Google domain for domain name.
- Used Github for version control.
- Developed Bootstrap modal for form submission to email in front-end and PHP in the back-end.
- Created website responsive using Bootstrap and CSS media queries.
- Technologies used: HTML, CSS, JavaScript, Bootstrap, PHP

Web Developer

HyQsoft Technologies   July 2018 - July 2021, Hyderabad, India

My primary role was to develop/implement and deployment of web-based applications and was also involved in integration and maintenance of core business applications. I have been a part of multiple projects with multiple teams. Some of the projects I worked on are:

Istanbul Furniture
- Content Management System and Invoice service for furniture.
- Modules: Admin, Salesperson, Delivery manager and employees.
- Worked in an agile environment using Microsoft Excel and JIRA.
- Developed a furniture e-commerce website from scratch.
- Technologies used: PHP, HTML, CSS, Bootstrap, JavaScript, DataTables, MySQL, AJAX, jQuery, Github, Bigrock.

FMS Welfare Trust
- Responsive Web Application providing information about the organization, included payment gateway services for donations.
- Admin module to upload images and videos.
- Worked in an agile environment using JIRA.
- Technologies used: PHP, HTML, CSS, Bootstrap, JavaScript, DataTables, MySQL, AJAX, jQuery, Github, Bigrock.

Nousury
- Created a Responsive content website for a financial trust company.
- Technologies used: HTML, CSS, Bootstrap, JavaScript, Github, Bigrock..
- Also used: Adobe Photoshop, Adobe Dreamweaver, Adobe Illustrator.
- Involved in the entire process from designing to coding to final product.

HyQsoft Website
- Created a Static Responsive Website providing information content about the company.
- Technologies used: HTML, CSS, Bootstrap, JavaScript, Github, Bigrock.

Mobile Solutions
- Inventory management system and Invoice service of products for sales persons.
- Technologies used: PHP, HTML, CSS, Bootstrap, JavaScript, MySQL, AJAX, jQuery, Github, Bigrock.

Al - Qalam Academy

- A Web Application which includes three modules i.e., admin, teachers and parents.
- Features: Daily session updates of student's class work details, result updates, teacher remarks and more, which will help parents to be informed about their children's schoolwork and progress.
- Technologies used: PHP, HTML, CSS, Bootstrap, JavaScript, MySQL, AJAX, jQuery, Github, Bigrock.

Hodan Global

- A Remittance Application which allows to transfer money and keeps track of all the users data such as sender, receiver and provides dashboards with the consolidated information about the transactions happening across the organization.
- Technologies used: PHP, HTML, CSS, Bootstrap, JavaScript, MySQL, AJAX, jQuery, Github, Bigrock.

Security Guard (Part-time)

Gardwell Security   December 2019 – Present, Toronto, Canada

- Patrolling inside and outside as required, keeping the building secure
- Notify assigned authorities, property manager, and security manager in emergencies
- Investigate and report unusual, hazards or suspicious situations to the property management and Security manager.
- Controlling all vehicles and pedestrian traffic entering the property
- Greet direct, sign in guest(s) and answer pertinent questions
- Monitor security cameras
- Issue and receipt of keys to trades, building staff and contractors
- Operate security equipment/systems, computers, radios and phones
- Ensure that the Site Safety and Emergency Procedures are followed in response to Fire Alarms and other Site Emergencies
- Create assigned reports
- Training new assigned guards for site specific procedures
